# Introduction

Hello! Thank you for purchasing from Template Rex!

Hope you enjoy your HYIP Manager MixPanel script, enjoy all its included features, get paid automatically via Coinbase, Coinpayments, Paykassa, PerfectMoney and Payeer! use the license included in your order to install it on your hosting / domain you want to start a project. you can contact me at **hey@templatere.com**! I promise I won't bite.

Remember that on our website you will find ready to use templates customized with your Script with attractive designs that will attract more customers to your project.

## How it works

HYIP Manager MixPanel supports PerfectMoney, Payeer, Bitcoin, Ethereum, Litecoin, BNB, Solana, Monero, USDCoin, BUSD, Tether, XPR, TRON, NEO, Bitcoin Cash, Dai, Dash, Dogecoin, Stellar, Zcash.

HYIP Manager MixPanel is a package for investment sites. This software helps you to create and manage your own HYIP with ease. Receive automatic deposits and automatic withdrawals in your project, bulk payment and instant payment included. The combination of price, features, performance and security is the best on the market today.

# Installation in CPANEL

(If you have a different administrator or VPS use the following steps as a global guide)

Installing the HYIP Manager MixPanel script will be a simple process check the following steps below.

1. Check that the script is in .ZIP before beginning the upload.

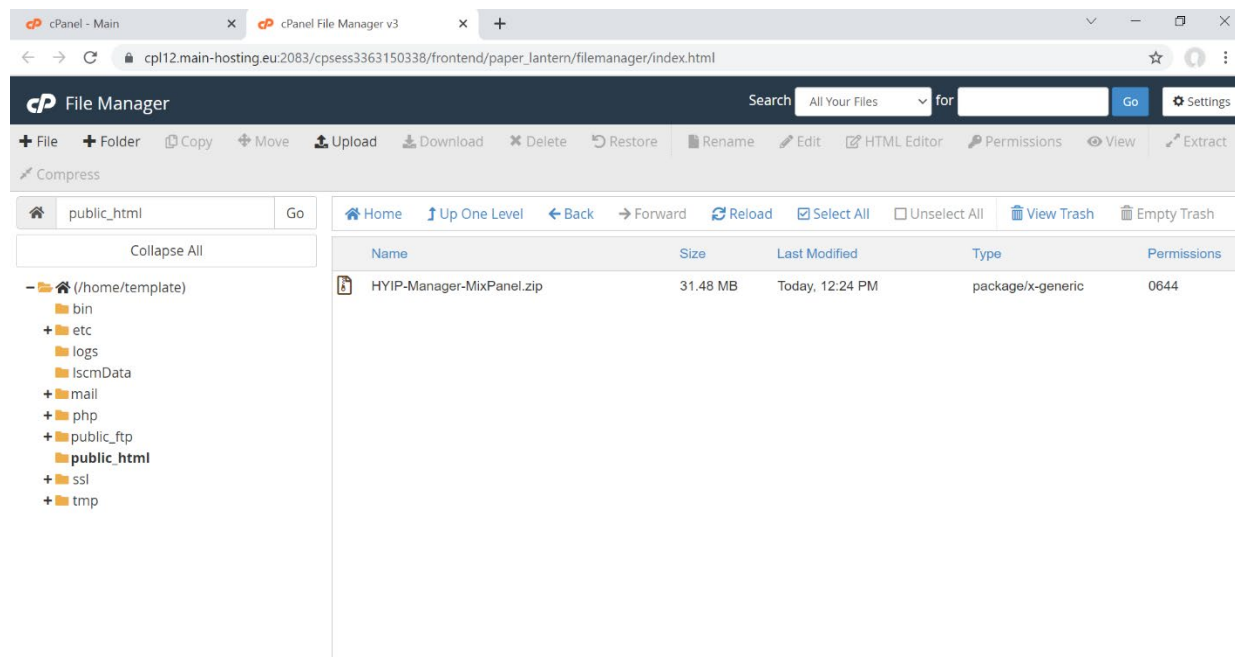

HYIP-Manager-MixPanel.zip

2. Upload HYIP-Manager-MixPanel the .ZIP using an FTP or file manager to the directory where the Gold Coders Manager Script is installed.

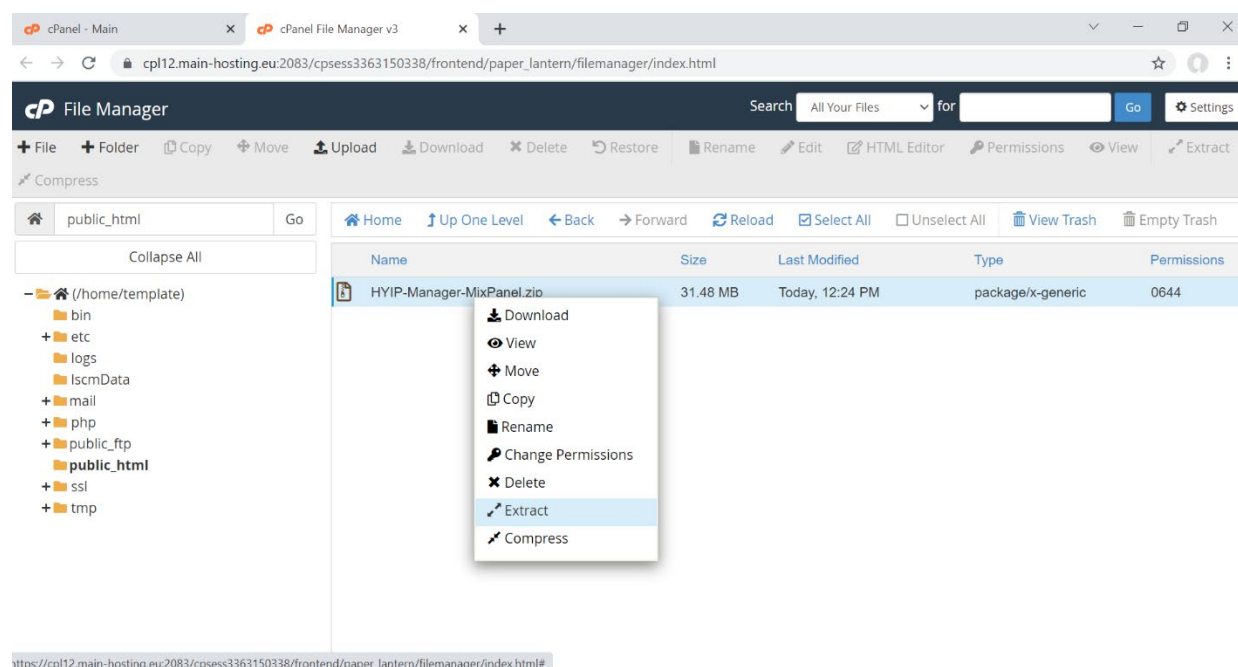

File Upload  
Select the file you want to upload to `"/home/template/public_html"`.  
Maximum file size allowed for upload: ∞  
 Overwrite existing files  
Drop files here to start uploading  
or  
[Select File](#)  
HYIP-Manager-MixPanel.zip  
53%  
16.97 MB / 31.48 MB (53%) complete  
[Go Back to "/home/template/public\\_html"](#)

3. It will have been uploaded to the root directory of the website as shown below.

4. Proceed to unzip your script in the root directory, this process will write some files to work the script correctly.

5. To see the files of your script in the root of your domain in the following way.

Name	Size	Last Modified	Type	Permissions
fonts	4 KB	Nov 11, 2021, 8:04 AM	httpd/unix-directory	0755
images	4 KB	Nov 11, 2021, 8:04 AM	httpd/unix-directory	0755

tmpl	4 KB	Nov 11, 2021, 8:04 AM	httpd/unix-directory	0755
tmpl_c	4 KB	Nov 11, 2021, 8:04 AM	httpd/unix-directory	0755
admin.php	1.89 MB	Nov 11, 2021, 8:04 AM	text/x-generic	0644
CHANGELOG.txt	1.41 KB	Nov 11, 2021, 8:04 AM	text/plain	0644
Documentation Script MixPanel.pdf	4.09 MB	Nov 11, 2021, 8:04 AM	application/pdf	0644
favicon.ico	1 byte	Nov 11, 2021, 8:04 AM	image/x-generic	0644
HYIP-Manager-MixPanel.zip	31.48 MB	Today, 12:24 PM	package/x-generic	0644
index.php	2.15 MB	Nov 11, 2021, 8:04 AM	text/x-generic	0644
install.php	1.19 MB	Nov 11, 2021, 8:04 AM	text/x-generic	0644

6. Then go to the CPanel of your hosting and configure the PHP version of your domain in version 5.6

The screenshot shows the cPanel dashboard with the 'SOFTWARE' section expanded. The 'Select PHP Version' icon is highlighted with a green box. The dashboard includes sections for SOFTWARE, ADVANCED, and PREFERENCES.

**SOFTWARE**

- Cloudflare
- RubyGems
- Softaculous Apps Installer
- WordPress Manager by Softaculous
- Optimize Website
- Select PHP Version
- PHP PEAR Packages
- Application Manager
- X-Ray App

**ADVANCED**

- LiteSpeed Web Cache Manager
- Cron Jobs
- Error Pages
- LSMCD User Manager
- Track DNS
- Apache Handlers
- Terminal
- Indexes
- MIME Types

**PREFERENCES**

Check your version PHP and change:

The image shows the cPanel PHP Selector interface. At the top, there are tabs for "PHP Selector", "Extensions", and "Options". The "PHP Selector" tab is active. Below the tabs, there is a "Current PHP version" dropdown menu set to "5.6 (current)". To the right of this menu is a "Reset to default" button. Below the version menu, there is a grid of PHP extensions, each with a checkbox and a letter icon. The "ioncube\_loader" extension is checked and highlighted with a green box. Other extensions include amqp, apcu, apm, ares, bcmath, big\_int, bitset, inotify, interbase, intl, ioncube\_loader\_4, json, jsmn, odbc, opcache, pdf, pdo, pdo\_dblib, pdo\_firebird, pdo\_mysql, spl\_types, ssh2, stats, stem, stomp, suhosin, sybase\_ct, and cusermen.

Current PHP version: 5.6 (current)

Extensions:

- amqp
- apcu
- apm
- ares
- bcmath
- big\_int
- bitset
- inotify
- interbase
- intl
- ioncube\_loader
- ioncube\_loader\_4
- json
- jsmn
- odbc
- opcache
- pdf
- pdo
- pdo\_dblib
- pdo\_firebird
- pdo\_mysql
- spl\_types
- ssh2
- stats
- stem
- stomp
- suhosin
- sybase\_ct
- cusermen

7. Go to your domain and enter the address by adding /install.php to start the process of installing your script Example : your-domain.com/install.php

The image shows the installation form for HYIP Manager MixPanel. The form is titled "HYIP Manager MixPanel - Installation" and is set against a light yellow background. It contains several sections for inputting data:

- MySQL data:** Includes fields for "Mysql host:" (localhost), "Mysql database name:", "Mysql username:", and "Mysql password:".
- Data host:** Includes a field for "Host:" (templatere demo.com).
- Admin account data:** Includes fields for "System E-mail:" (noreply@templatere demo.com), "Admin E-mail:", "Admin Login:", and "Admin Password:".

At the bottom of the form, there is an "Install" button. The footer of the page reads "All Rights Reserved. HYIP Manager MixPanel".

8. The script will request the information of your database (name of database, user database and password of your database) enter them and finally your email of administrator and administrator password that will be linked to your script.

The screenshot shows a web browser window with the URL `templatere demo.com/install.php`. The page title is "HYIP Manager MixPanel - Installation". The form is divided into several sections:

- MySQL data:**
  - Mysql host: localhost
  - Mysql database name: your-database-name
  - Mysql username: your-username
  - Mysql password: your-password
- Data host:**
  - Host: templatere demo.com
- Admin account data:**
  - System E-mail: noreply@templatere demo.com
  - Admin E-mail: hey@templatere demo.com
  - Admin Login: admin123
  - Admin Password: \*\*\*\*\*
- Install:** A button to submit the form.

At the bottom of the page, it says "All Rights Reserved. HYIP Manager MixPanel".

9. This completes the process of installing your script correctly, you can see a confirmation screen where you have finished installing the script, remember to save the access credentials of your administrator user.

The screenshot shows the same web browser window, but now the form is a confirmation screen. The title is "HYIP Manager MixPanel - Installation". The main content is a green box with the text "Script successfully installed!". Below this, there is a table with the following information:

Path to script	<a href="https://templatere demo.com">https://templatere demo.com</a>
Admin login:	admin123
Admin password:	admin123
Path to MixPanel	<a href="https://templatere demo.com/mixpanel">https://templatere demo.com/mixpanel</a>

Below the table, there is a yellow box with the following text:

First login to the administration area, go to the configuration screen and specify your site name and other information, then go to Mixpanel to configure your payment methods, your Mixpanel administrator credentials are the same.

At the bottom of the page, it says "All Rights Reserved. HYIP Manager MixPanel".

10. Now click first on the Path to script link, a new tab will open with your website, you must first visit your website URL before proceeding with the correct activation of MixPanel

**HYIP Manager MixPanel - Installation**

Script successfully installed!

<b>Path to script</b>	<a href="https://templatere demo.com">https://templatere demo.com</a>
<b>Admin login:</b>	admin123
<b>Admin password:</b>	admin123
<b>Path to MixPanel</b>	<a href="https://templatere demo.com/mixpanel">https://templatere demo.com/mixpanel</a>

First login to the administration area, go to the configuration screen and specify your site name and other information, then go to Mixpanel to configure your payment methods, your Mixpanel administrator credentials are the same.

All Rights Reserved. HYIP Manager MixPanel

11. After visiting your website URL in the previous step, go back to your installer tab and proceed to activate your MixPanel to use your payment processors.

**HYIP Manager MixPanel - Installation**

Script successfully installed!

<b>Path to script</b>	<a href="https://templatere demo.com">https://templatere demo.com</a>
<b>Admin login:</b>	admin123
<b>Admin password:</b>	admin123
<b>Path to MixPanel</b>	<a href="https://templatere demo.com/mixpanel">https://templatere demo.com/mixpanel</a>

First login to the administration area, go to the configuration screen and specify your site name and other information, then go to Mixpanel to configure your payment methods, your Mixpanel administrator credentials are the same.

All Rights Reserved. HYIP Manager MixPanel

12. You should now be on the MixPanel activation and installation screen, **enter exactly the same data from your database used previously** (name of database, user database and password of your database) and your MixPanel license

The screenshot shows a web browser window with two tabs: 'cPanel - Main' and 'HYIP Manager MixPanel - Install'. The address bar shows 'templatere demo.com/mixpanel/installer.php'. The main content area features a blue header with the text 'MixPanel Installation' and 'Enter database and license to activate your MixPanel.' Below the header is a form titled 'MySQL Data' with four input fields: 'MySQL host' (containing 'localhost'), 'MySQL Database Name' (containing 'Enter your MySQL Database Name'), 'MySQL Database Username' (containing 'Enter your MySQL Database Username'), and 'MySQL Database Password' (empty). A 'Submit' button is visible at the bottom of the form.

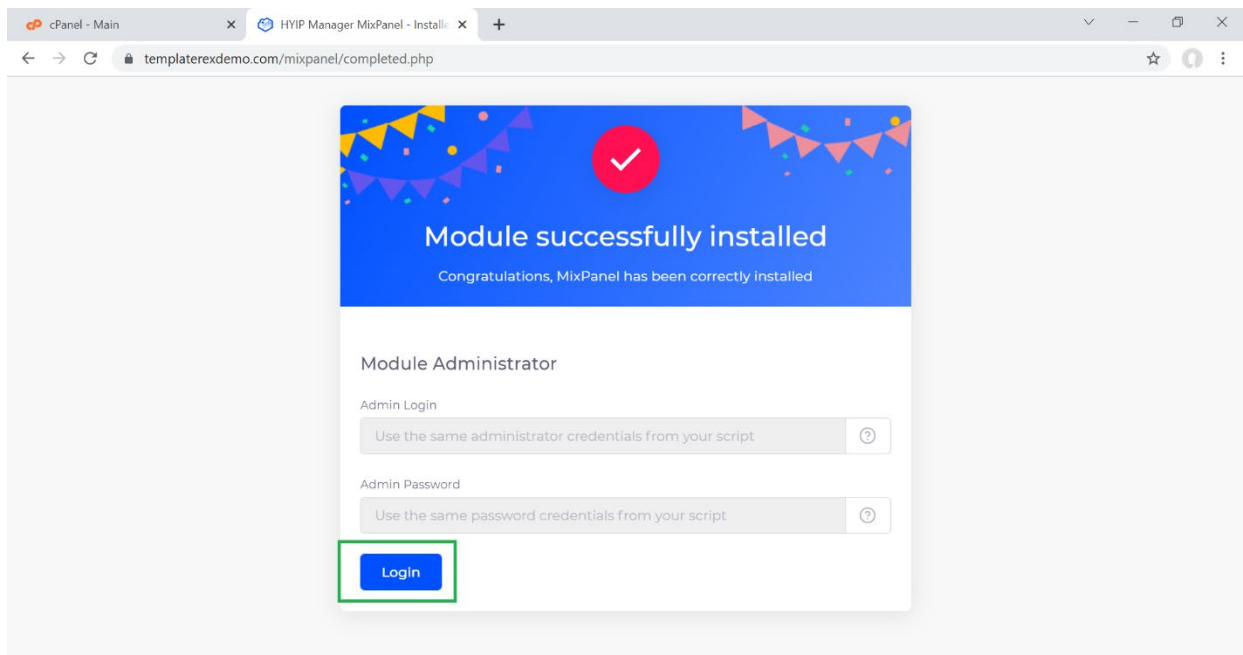

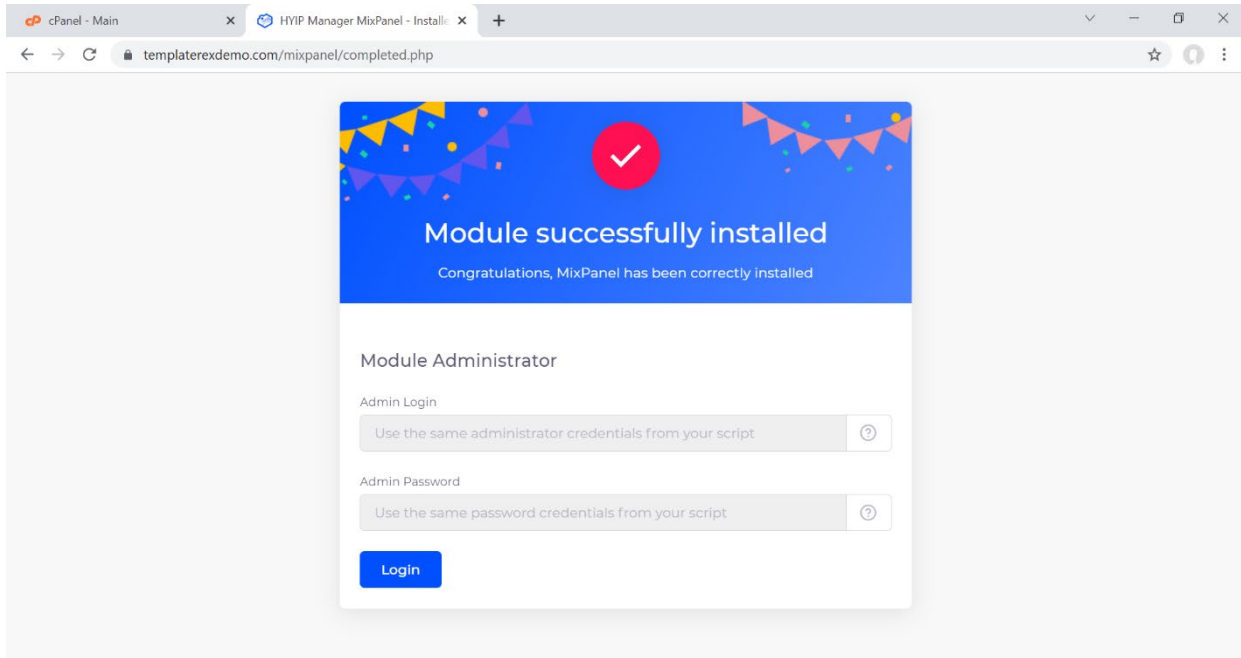

13. Enter exactly the same data from your database used previously (name of database, user database and password of your database) and your MixPanel license.

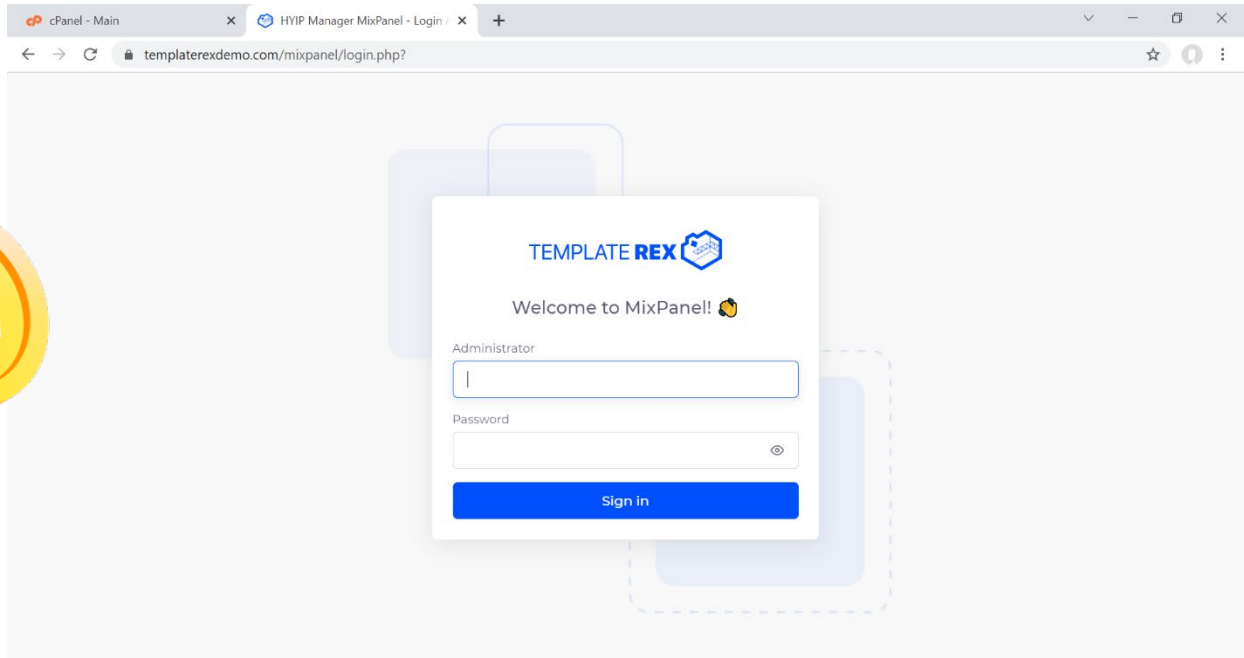

The screenshot shows the same web browser window as in the previous image. The 'MySQL Data' form is now filled with the following information: 'MySQL host' (localhost), 'MySQL Database Name' (your-database-name), 'MySQL Database Username' (your-database-username), and 'MySQL Database Password' (your-database-password). Below these fields is a 'Enter License Key' field containing the key 'REX-a4cfba0f-ac255769-b1d4eff3'. At the bottom of the form are two buttons: 'Submit' and 'Reset'.

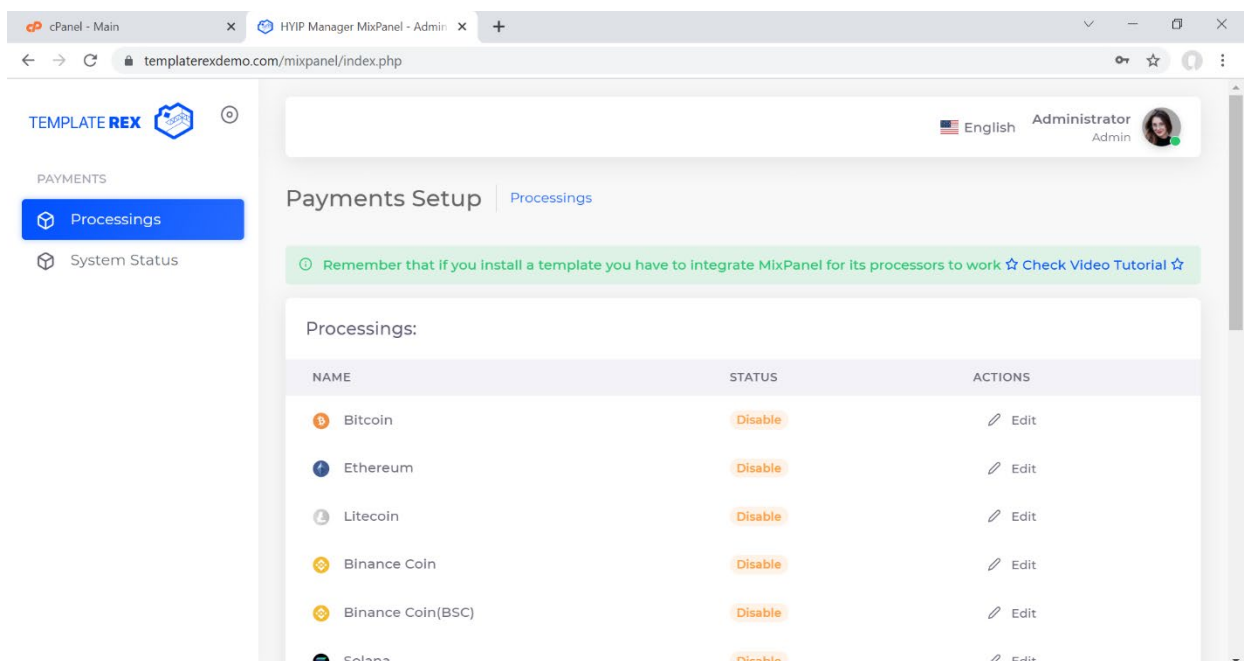

14. If you enter your database information correctly and your MixPanel license is valid, you will see the screen to confirm the complete installation.

16. In the MixPanel login screen use exactly the same login details to your script administrator previously configured, you will use this administrator for your script and for MixPanel.

17. You will be redirected to your payment processors panel there, configure the payment processors that you want to activate in your project.

18. You will be redirected to your payment processors panel there, configure the payment processors that you want to activate in your project.

The screenshot shows the 'Payments Setup' page in the MixPanel admin interface. A sidebar on the left contains 'Processings' and 'System Status'. The main content area has a 'Payments Setup' header and a 'Processings' table. A green banner at the top reads: 'Remember that if you install a template you have to integrate MixPanel for its processors to work ☆ Check Video Tutorial ☆'. The table lists the following processors:

NAME	STATUS	ACTIONS
Bitcoin	Active	Edit
Ethereum	Disable	Edit
Litecoin	Disable	Edit
Binance Coin	Disable	Edit
Binance Coin(BSC)	Disable	Edit
Solana	Disable	Edit

19. When you finish setting up your payment methods they will be integrated into your project.

The screenshot shows the 'Deposit' page in the MixPanel interface. The page title is 'Please confirm your deposit:'. It features a navigation sidebar on the left and a main content area with deposit details and a QR code. The deposit details are as follows:

<b>Plan:</b>	Bronze
<b>Profit:</b>	2.20% Daily for 365 days
<b>Principal Return:</b>	No (Included in profit)
<b>Principal Withdraw:</b>	Not available
<b>Credit Amount:</b>	\$36.00
<b>Deposit Fee:</b>	0.00% + \$0.00 (min. \$0.00 max. \$0.00)
<b>Debit Amount:</b>	\$36.00

Payment Processor: Coinpayments  
Transaction created with ID: CPFFSU8YZ2RSGNBDSJYWKLPSGI  
Please send exactly **0.00098000 BTC** to address  
<3AiwfLA9wGHrTyyrSmXGbb8nw9x8am3xz>  
Payment: [Order Status URL](#)

Order status: Waiting for payment...  
2/6/2021 2:6:42

**Remember all the processors that you configure and activate in your MixPanel will be activated in your project where you can receive automatic payments and withdrawals.**

## Video Tutorial – Install HYIP Manager MixPanel

Use our Video tutorial to help guide you in the installation and activation of your HYIP Manager MixPanel, click on the image or follow the following link:

# How to integrate MixPanel in any template for HYIP Manager?

**IMPORTANT:** The MixPanel script is fully compatible with any template of the GoldCoders HYIP Manager Pro script, when you install a template in your project you must integrate MixPanel to your template to see the payment processors of your MixPanel.

If you have installed a template you can see the status if mixpanel is integrated into the template, you can automatically integrate MixPanel into your template, use the option Integrate MixPanel Now.

## VIDEO TUTORIAL INTEGRATE MIXPANEL IN ANY TEMPLATE

Remember that you must integrate MixPanel in your template to use all MixPanel processors so you will receive automatic payments and withdrawals in your project and if it is necessary to make a customization in your design to adjust the details, follow the steps in the following video to integrate MixPanel in any HYIP Manager template:

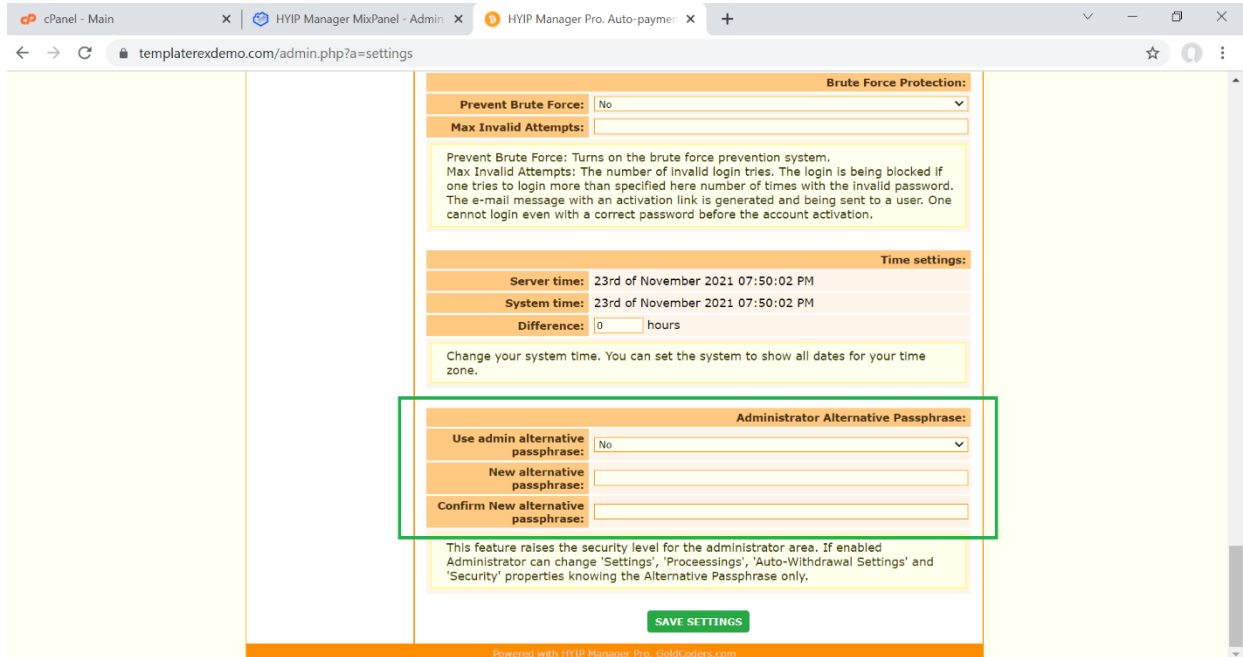

[View video tutorial integrate MixPanel in any HYIP Manager template](#)

# Protect Your Installation For Security

**IMPORTANT!** It is recommended to activate the Administrator Alternative Passphrase option in your administrator for automatic withdrawals and increase the security of your project.

The screenshot shows the 'Brute Force Protection' and 'Administrator Alternative Passphrase' settings in the HYIP Manager Admin interface. The 'Administrator Alternative Passphrase' section is highlighted with a green border. It includes a dropdown menu for 'Use admin alternative passphrase' (set to 'No'), and input fields for 'New alternative passphrase' and 'Confirm New alternative passphrase'. A 'SAVE SETTINGS' button is located below the form.

**Brute Force Protection:**

Prevent Brute Force: No

Max Invalid Attempts: [input field]

Prevent Brute Force: Turns on the brute force prevention system. Max Invalid Attempts: The number of invalid login tries. The login is being blocked if one tries to login more than specified here number of times with the invalid password. The e-mail message with an activation link is generated and being sent to a user. One cannot login even with a correct password before the account activation.

**Time settings:**

Server time: 23rd of November 2021 07:50:02 PM

System time: 23rd of November 2021 07:50:02 PM

Difference: 0 hours

Change your system time. You can set the system to show all dates for your time zone.

**Administrator Alternative Passphrase:**

Use admin alternative passphrase: No

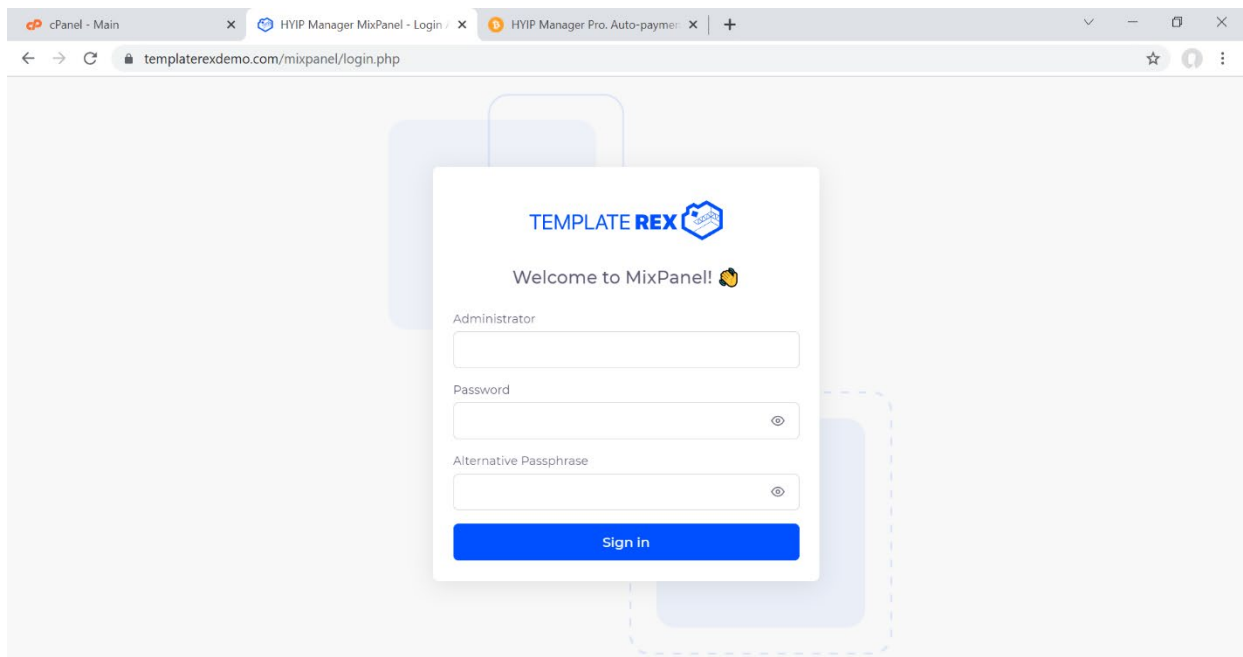

New alternative passphrase: [input field]

Confirm New alternative passphrase: [input field]

This feature raises the security level for the administrator area. If enabled Administrator can change 'Settings', 'Processings', 'Auto-Withdrawal Settings' and 'Security' properties knowing the Alternative Passphrase only.

SAVE SETTINGS

Once this option is activated, MixPanel will request your Administrator Alternative Passphrase configured in HYIP Manager and to modify the options of your administrator.

The screenshot shows the 'MixPanel - Login' page in the HYIP Manager Admin interface. The login form includes fields for 'Administrator', 'Password', and 'Alternative Passphrase', along with a 'Sign in' button.

# Do you have problems with the installation?

Do not worry if for some reason the script is not displaying it on your website, these are some steps that will help, we recommend that you first check the FAQ. Many questions are answered here:

[www.templaterex.com/script-hyip-manager-pro-mixpanel/#faq](http://www.templaterex.com/script-hyip-manager-pro-mixpanel/#faq)

**STEP 1.** You verify that the content of the template has been unzipped at your root site and is not a folder:

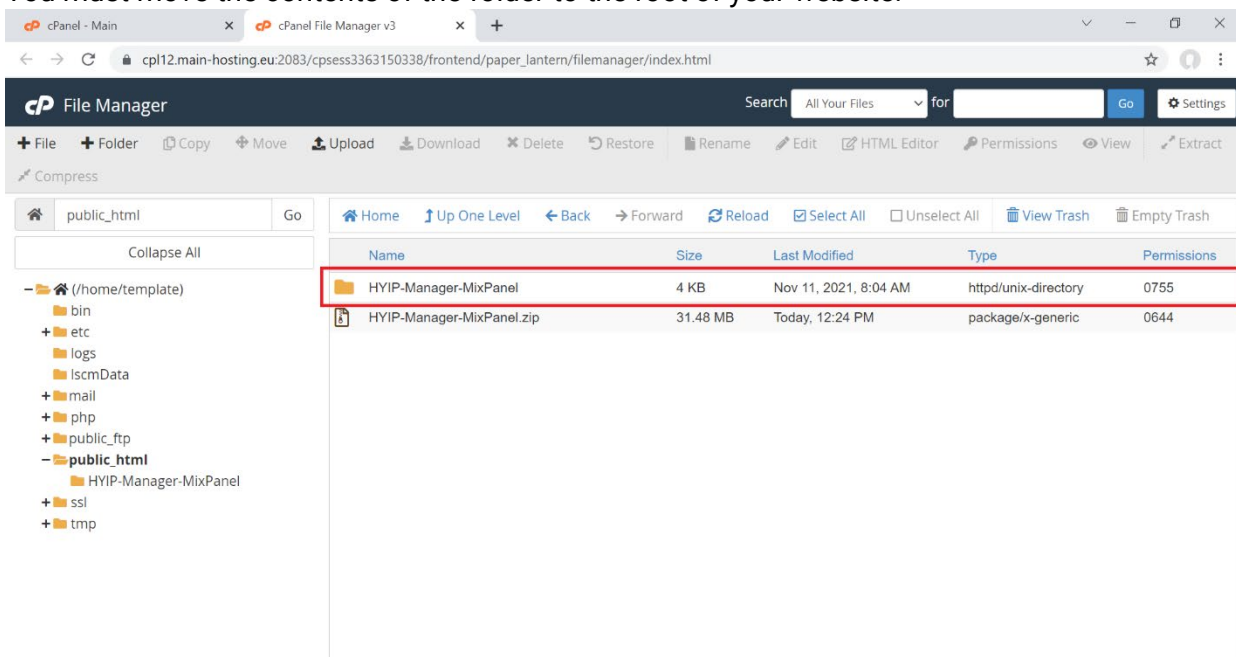

The screenshot shows the cPanel File Manager interface. The left sidebar displays a directory tree with the following structure:

- public\_html
  - (/home/template)
    - bin
    - etc
    - logs
    - IscomData
    - mail
    - php
    - public\_ftp
    - public\_html
      - HYIP-Manager-MixPanel
    - ssl
    - tmp

The main content area shows a table of files and folders:

Name	Size	Last Modified	Type	Permissions
HYIP-Manager-MixPanel	4 KB	Today, 9:35 PM	httpd/unix-directory	0755
HYIP-Manager-MixPanel.zip	28.93 MB	Today, 1:27 PM	package/x-generic	0644

You must move the contents of the folder to the root of your website:

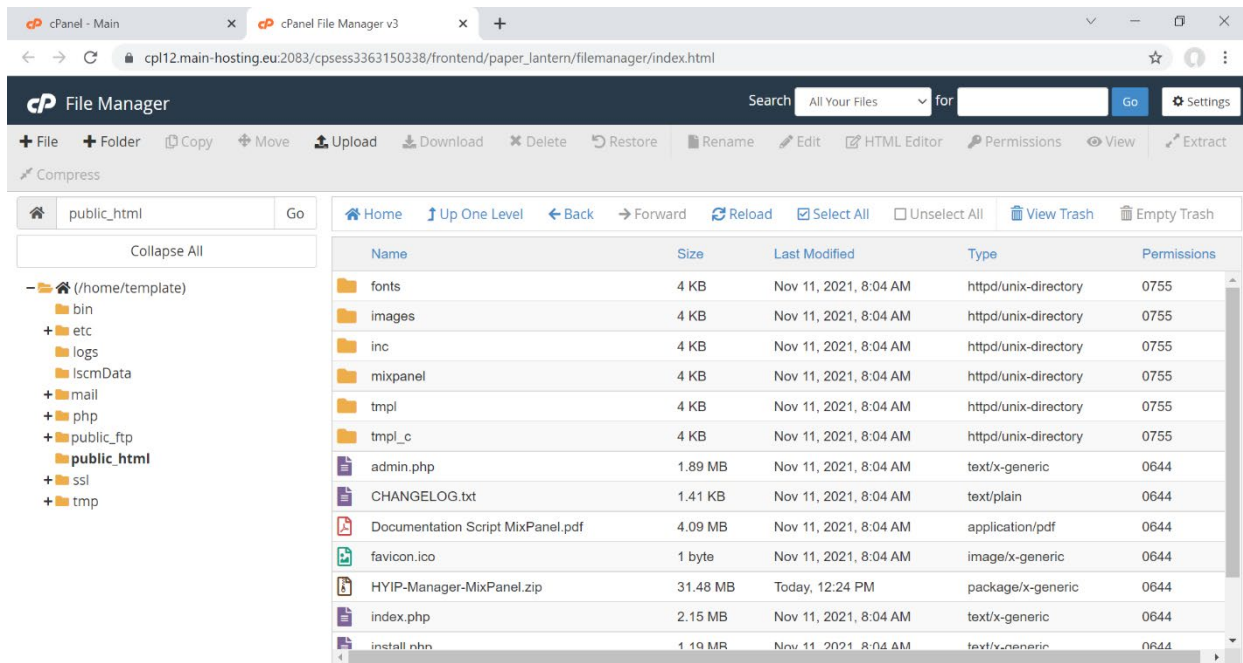

The screenshot shows the cPanel File Manager interface after the folder has been moved. The left sidebar directory tree is updated:

- public\_html
  - (/home/template)
  - bin
  - etc
  - logs
  - IscomData
  - mail
  - php
  - public\_ftp
  - public\_html
    - HYIP-Manager-MixPanel
  - ssl
  - tmp

The main content area table is updated:

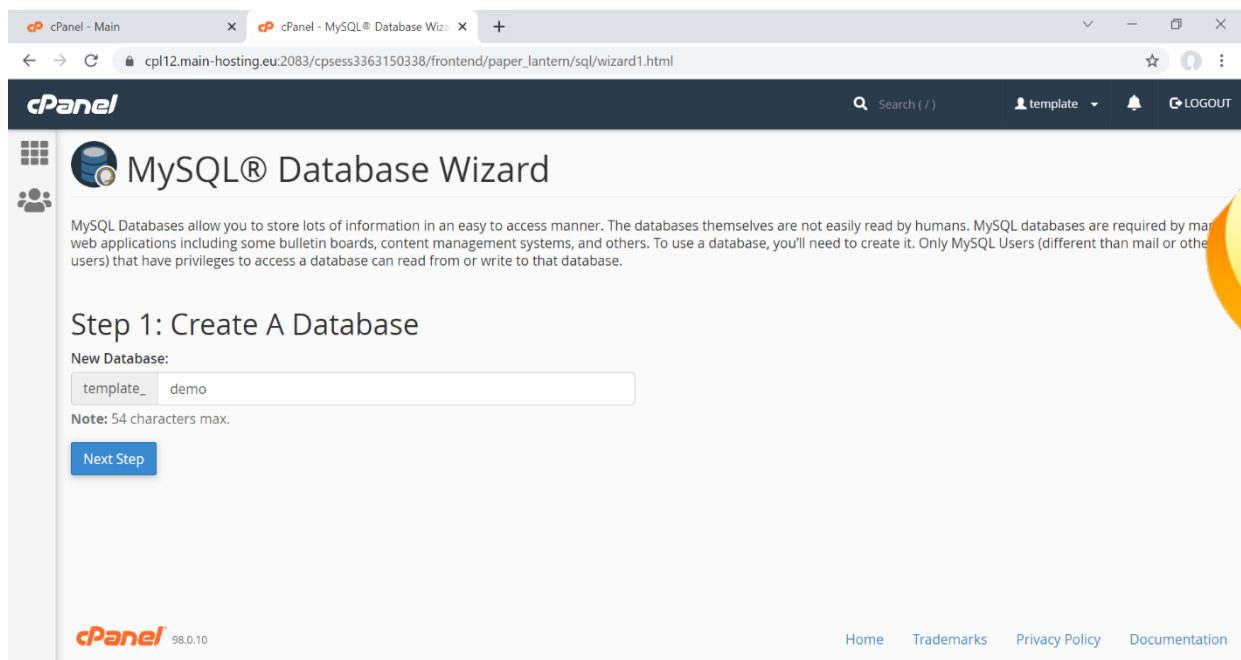

Name	Size	Last Modified	Type	Permissions
HYIP-Manager-MixPanel	4 KB	Nov 11, 2021, 8:04 AM	httpd/unix-directory	0755
HYIP-Manager-MixPanel.zip	31.48 MB	Today, 12:24 PM	package/x-generic	0644

You must move the contents of the folder to the root of your website:

The screenshot shows the cPanel File Manager interface. The left sidebar displays a tree view of the file system, with the 'public\_html' folder selected. The main content area shows a list of files and folders with columns for Name, Size, Last Modified, Type, and Permissions. The files listed include folders like 'fonts', 'images', 'inc', 'mixpanel', 'tmpl', and 'tmp', as well as files like 'admin.php', 'CHANGELOG.txt', 'Documentation Script MixPanel.pdf', 'favicon.ico', 'HYIP-Manager-MixPanel.zip', 'index.php', and 'install.php'.

**STEP 2.** Review the connection data to your database which should have been previously created, if the data in your database is not correct, the script will not continue the installation process.

The screenshot shows the cPanel MySQL Database Wizard interface. The page title is 'MySQL® Database Wizard'. It provides an overview of MySQL databases and is currently on 'Step 1: Create A Database'. A text input field shows 'template\_ demo' as the new database name, with a note that it is 54 characters max. A 'Next Step' button is visible.

cPanel - Main x cPanel - MySQL® Database Wizard x +

<input checked="" type="checkbox"/> DELETE	<input checked="" type="checkbox"/> DROP
<input checked="" type="checkbox"/> EVENT	<input checked="" type="checkbox"/> EXFLUTE

**STEP 3.** Remember to verify that your PHP version is in 5.6 & extension ioncube\_loader for your domain where the script is and it will be installed

The screenshot shows the cPanel interface for the PHP Selector Extensions page. The current PHP version is set to 5.6 (current). The 'ioncube\_loader' extension is checked and highlighted with a green box. Other extensions like 'ioncube\_loader\_4' are also visible but not checked.

S	ssh2	<input type="checkbox"/>
S	stats	<input type="checkbox"/>
S	stem	<input type="checkbox"/>
S	stomp	<input type="checkbox"/>
S	suhosin	<input type="checkbox"/>
S	sybase_ct	<input type="checkbox"/>
S	sysmsg	<input type="checkbox"/>
S	syssem	<input type="checkbox"/>
S	sysvshm	<input type="checkbox"/>
T	tideways	<input type="checkbox"/>
T	tidy	<input checked="" type="checkbox"/>
T	timezonedb	<input checked="" type="checkbox"/>
T	trader	<input type="checkbox"/>
T	translit	<input type="checkbox"/>
U	uploadprogress	<input type="checkbox"/>

**STEP 5.** We recommend that you use our requirements verification system, go to: [www.yourdomain.com/mixpanel/infomix.php](http://www.yourdomain.com/mixpanel/infomix.php), you can see if your hosting meets all the requirements, as shown below.

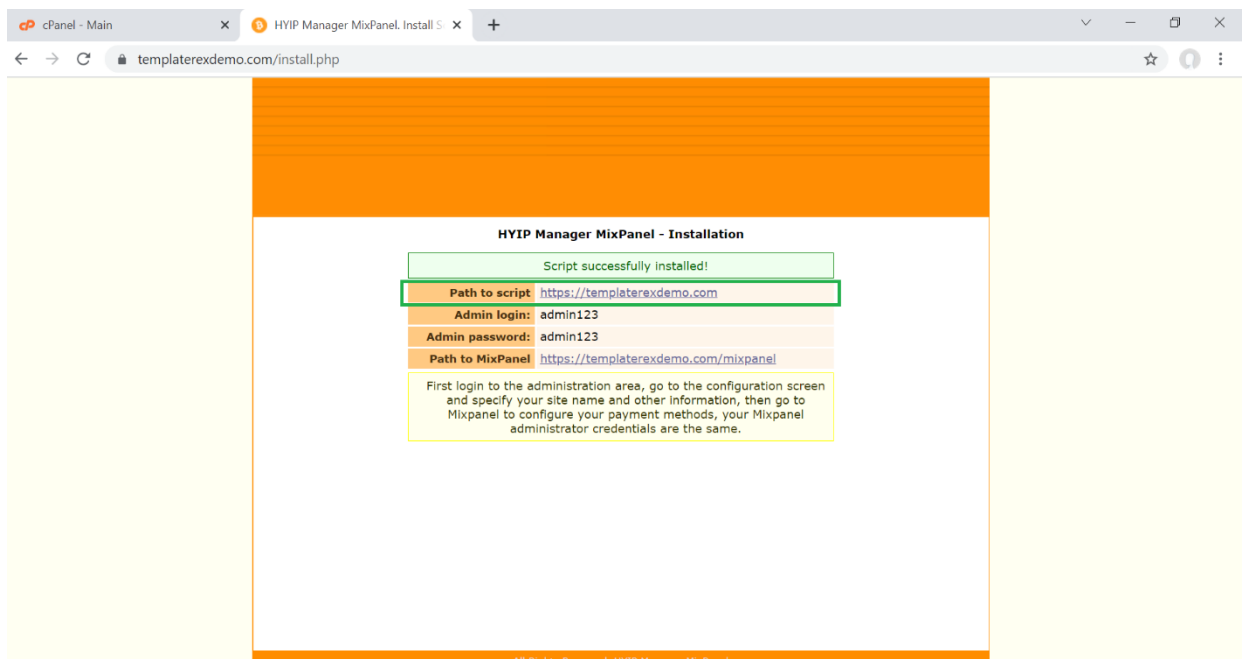

**STEP 6.** If you continue to have problems starting the installation by having a blank screen, a cache problem may have been generated, after performing the above steps, first try to purge your browser cache With CTRL + F5 this should purge the cache, as a second option delete all the files and reload the .zip script and unzip it again at the root of this file you should not have any more problems to continue its installation.

**STEP 7.** If you are getting this error when trying to activate your MixPanel, you must first follow 2 steps, verify that you have done them before correctly activating your MixPanel.

It is necessary that you first install your HYIP Manger script and as a second step you have to visit the URL of your website, you can open it in a tab, and then you can continue with the activation of your MixPanel.

Our program is intended for people willing to achieve their financial freedom but unable to do so because they're not financial experts.  
templaterexdemo.com is a long term high yield private loan program, backed up by Forex market trading and investing in various funds and activities. Profits from these investments are used to enhance our program and increase its stability for the long term.

Plan 2	\$101.00 - \$1000.00	20.00
Plan 3	\$1001.00 and more	50.00

After visiting your website, you will only have to re-enter the same data in your Database and the license key of your MixPanel.

templaterexdemo.com/mixpanel/installer.php

**MySQL Data**

MySQL host

MySQL Database Name

MySQL Database Username

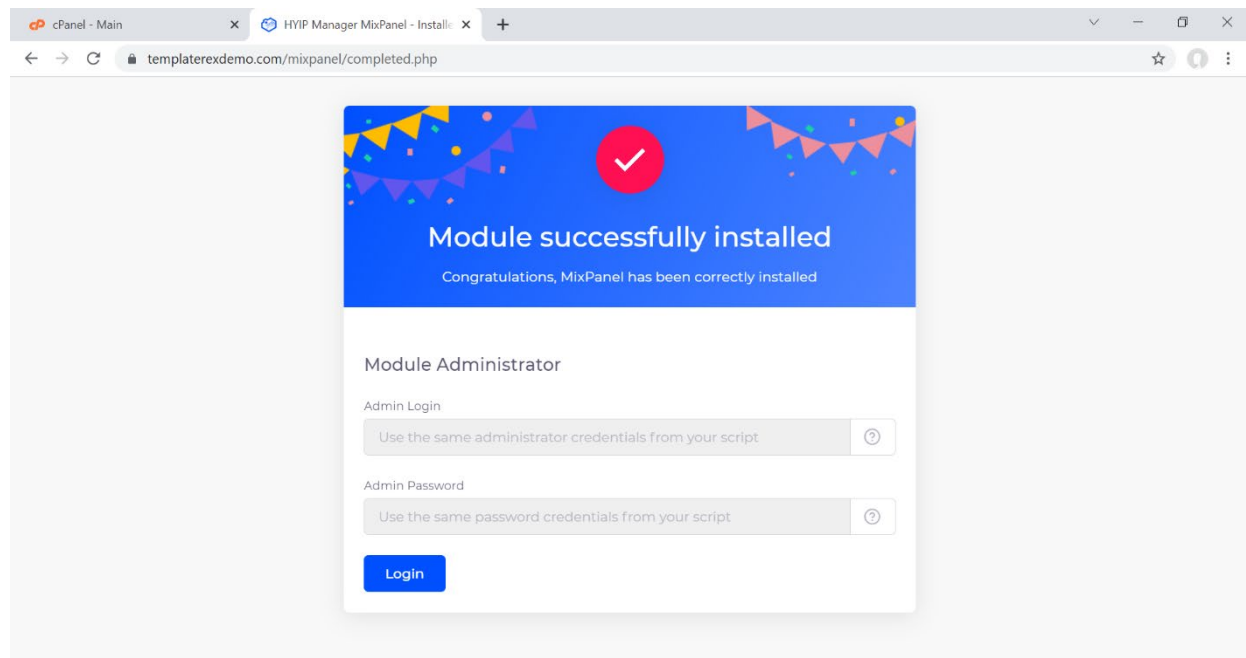

MySQL Database Password

Enter License Key

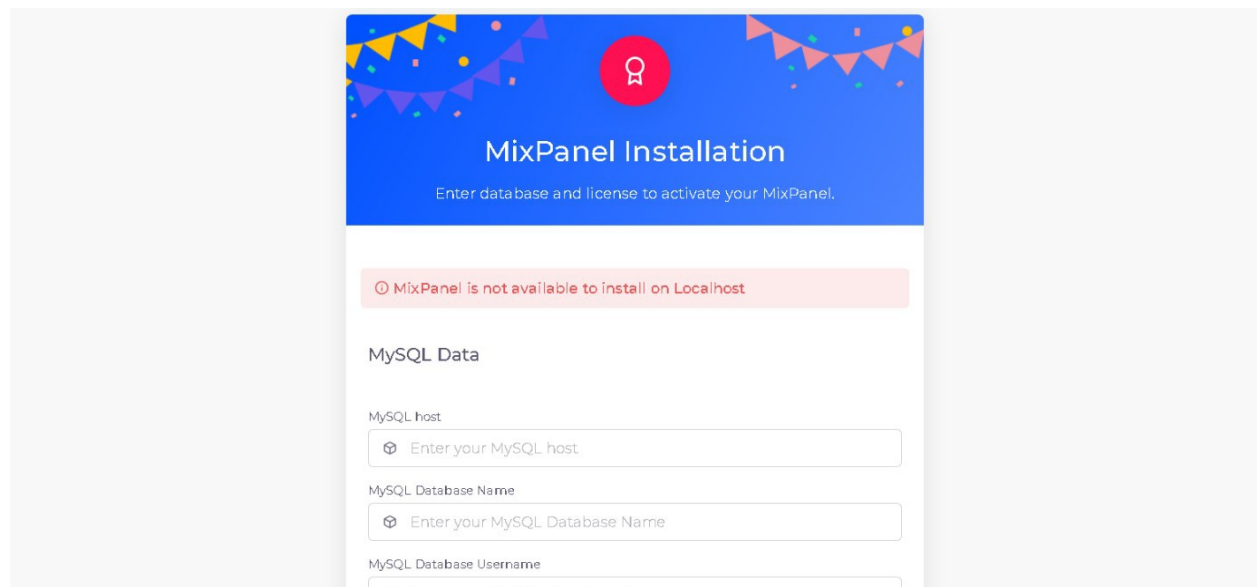

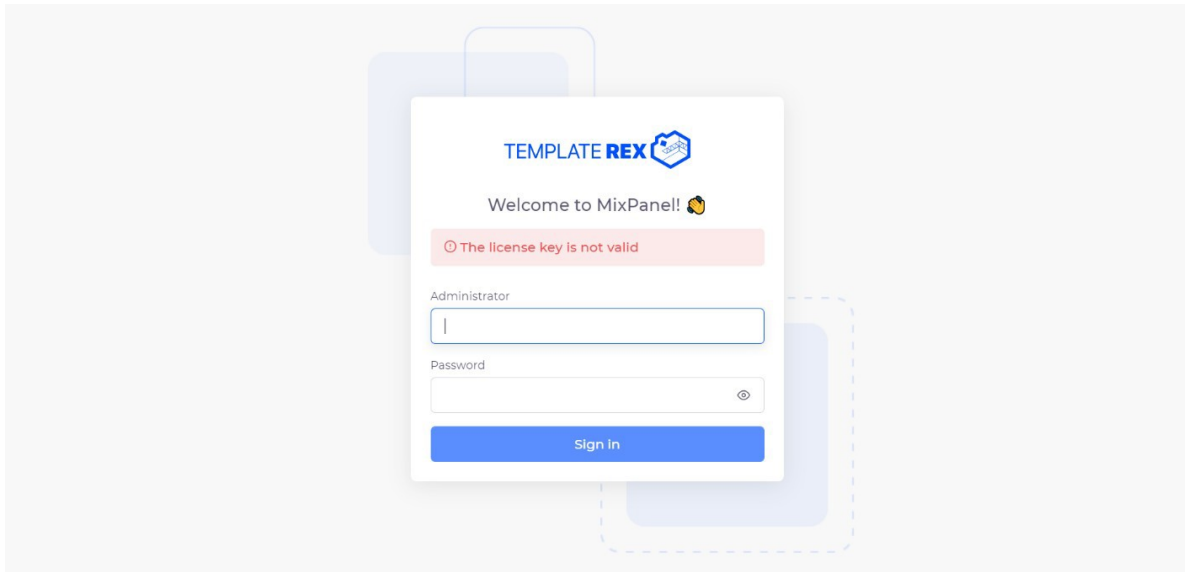

Once you enter all the data correctly in your MixPanel you will get the confirmation screen of the complete installation!

**STEP 8.** MixPanel is not available to install on Localhost, it is only available to activate on live sites, if you try to install it on localhost, you will get an error, you can install your script in localhost mode to test global functions and others but you will not be able to activate your MixPanel on localhost.

**STEP 9.** If when trying to log into MixPanel you are getting the message: The license key is not valid, verify that you have installed your license correctly on your server.

**A.** Check the permissions of the files on your server:

Name	Size	Last Modified	Type	Permissions
fonts	4 KB	Jun 1, 2021, 6:41 AM	httpd/unix-directory	0755
images	4 KB	Jun 1, 2021, 6:41 AM	httpd/unix-directory	0755
inc	4 KB	Jun 1, 2021, 6:41 AM	httpd/unix-directory	0755
mixpanel	4 KB	Today, 2:12 PM	httpd/unix-directory	0755
tmpl	4 KB	Jun 4, 2021, 3:22 PM	httpd/unix-directory	0755
tmpl_c	12 KB	Today, 3:27 PM	httpd/unix-directory	0755
admin.php	1.84 MB	Jun 1, 2021, 6:41 AM	application/x-httpd-php	0644
favicon.ico	1.12 KB	Jun 4, 2021, 3:13 PM	image/x-generic	0644
index.php	2.1 MB	Jun 1, 2021, 6:41 AM	application/x-httpd-php	0644
payeer_1418524498.txt	10 bytes	Jun 2, 2021, 7:15 PM	text/plain	0644
settings.php	16.48 KB	Yesterday, 7:42 AM	application/x-httpd-php	0644
style.css	2.42 KB	Jun 1, 2021, 6:41 AM	text/css	0644

**B.** Try re-download and reinstall your MixPanel once you verify the previous steps you can follow the following Video Tutorial:

<https://www.templaterex.com/my-account/>

[Video Tutorial How Install MixPanel](#)

**STEP 10.** If after installing everything and following the previous steps you get the error 503 - Service Unavailable when trying to enter your MixPanel, contact our Template Rex team this error is related to your Hosting, send us a ticket and we will help you solve it.

# 503

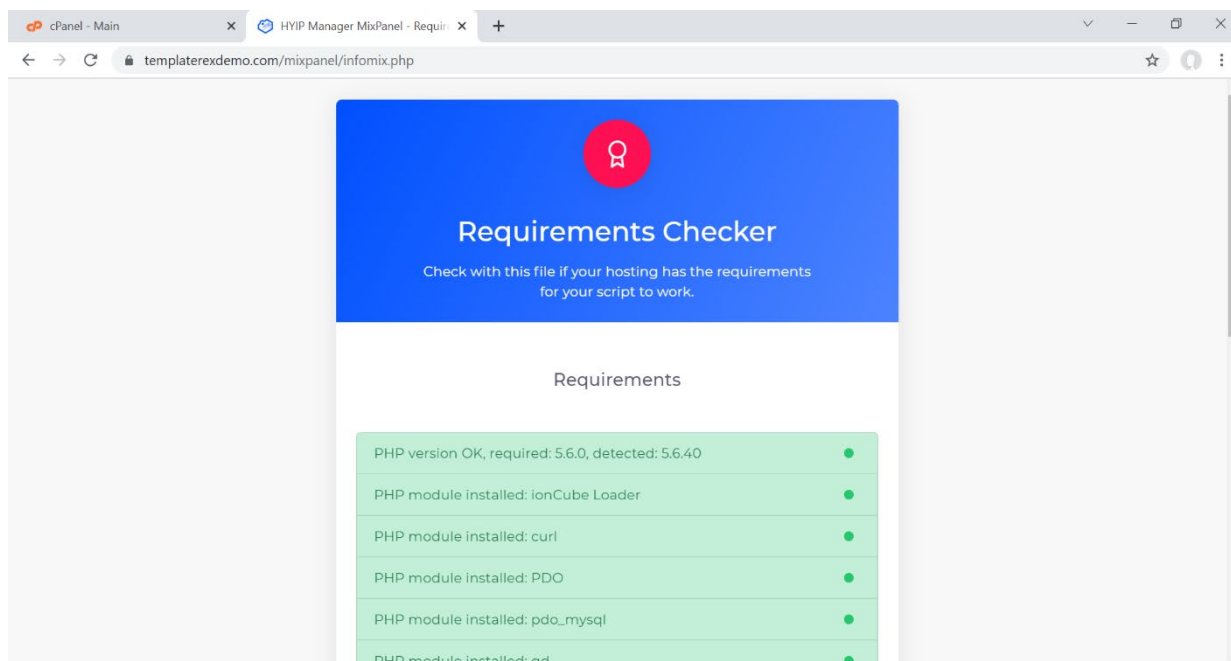

**Service Unavailable**

The server is temporarily busy, try again later!

## It is recommended

We recommend that you use our requirements verification system, go to: [www.yourdomain.com/mixpanel/infomix.php](http://www.yourdomain.com/mixpanel/infomix.php), you can see if your hosting meets all the requirements, as shown below.

1. Protect your installation with services such as SSL certificate, Firewall, DDOS, CDN to increase security in your project and avoid attackers.
2. Generate strong passwords for your project if you have shared a password remember to change it, keep them in a safe place, you can use the following site to generate strong passwords or use your preferred service.

[www.passwordsgenerator.net](http://www.passwordsgenerator.net)

3. **Remember that your purchase has 1 month of support, our support does not extend to customizations of our customers.**

## Bonus Coupon

We want to support your next project! That's why we give you 10% discount on your next purchase in our store! Cheers!!!
